Subject: House Bill 5225

Dear Committee Members,

I to urge you to support HB 5225 which will abolish the obsolete "permit-to-purchase" law requiring law abiding citizens to obtain a permit to purchase. The National Instant Criminal Background Check System has been in place since 1998 and handles this at the time of purchase. Please consider that eliminating this will result in financial savings to the state of Michigan and it's taxpayers, remove layers of unnecessary bureaucracy at the state and local levels. The current program is duplicating what is already tracked by the federal program.
